Launch of Georgia Power's First Grid-Connected Battery System

Georgia Power has celebrated the commercial operation of its first "grid-connected" Battery Energy Storage System (BESS) at the Mossy Branch facility. This system, with a capacity of 65 megawatts (MW) for four-hour deployment, is designed to improve energy reliability and resilience in Georgia's power grid.

Georgia Power's first battery energy storage system

65 MW Mossy Branch Battery Facility adds resiliency to Georgia's electric grid; Company leadership and elected officials tour site in Talbot County on Thursday ATLANTA, Nov. 8, 2024 /PRNewswire/ -- Georgia Power leaders joined ...

Georgia Power outlines battery storage projects to PSC

A fourth battery-storage facility would double the storage capacity at the McGrau Ford Battery Facility under development in Cherokee County.. The projects, which would add 500 megawatts of electrical generating capacity, are included in Georgia Power's plan to add 6,600 megawatts to the company's energy-supply portfolio from sources including natural gas and solar energy.

Georgia Power Determines Locations for Four Battery Storage ...

Georgia Power has identified locations for 500 MW of new battery energy storage systems (BESS) authorized by the Georgia Public Service Commission (PSC) earlier this year as part of the company's 2023 Integrated Resource Plan (IRP) Update. Because battery storage can provide stored energy to the grid over several hours, BESS resources can

Grid of the Future: The Crucial Role of Battery Storage

What are Georgia Power's Battery Storage Initiatives? We are committed to leading the charge towards a sustainable energy future. Our battery storage initiatives are a testament to this commitment. One of these projects is the Mossy Branch Battery Facility, a state-of-the-art 65-megawatt battery energy storage system currently under construction.
