Rising sea levels and the increase of shoreline wave energy at ...

American Samoa is experiencing rapid relative sea level rise due to increases in global sea level and significant post-2009 earthquake land subsidence, endangering homes and critical infrastructure.

Samoa opens new source of renewable electricity

The launching of a new electricity source that will benefit up to 5,000 families on the north-western side of the island of Upolu, is a milestone for Samoa's renewable energy efforts. It is also a significant contribution to the country's climate action commitments. The SAT \$11.3 million Afolau Biomass Gasification Power Plant, is a first of its kind facility to be set up ...

Iberdrola invests in RTS for offshore wind and energy solutions

Iberdrola, through its start-up programme Perseo, has invested in Revestimientos Técnicos Sostenibles (RTS) to advance innovative solutions in manufacturing insulation and anti-corrosion coatings.. The solutions are particularly relevant for offshore wind structures and building energy renovations, aiming to improve quality and achieve significant ...

American Samoa Energy Strategies

American Samoa has limited resources and, therefore, suffers economically without assistance from abroad. Investing in energy efficiency and renewable energy is an opportunity to alter that perception. This strategic energy plan prepares American Samoa to harvest its abundant energy resources for the betterment of all its citizens.
