About Us

He currently writes a monthly column for the Columbia Missourian on solar energy and climate change issues. Jay's renewable energy and utility experience is now enlisted to help Green Leaf Solar expand solar energy to homes and businesses in the ...

Solar

Solar modules/panels absorb sunlight and convert it into D/C (direct current electricity). 2. The electricity is then routed to an Inverter which then converts the D/C power to A/C power. This conversion is necessary because the power being fed from your utility grid is also A/C power, and you will be sending power back to the grid so it must

Home
