Greenland novatek power

Overview

Will Novatek build a gas turbine power plant?

MOSCOW. May 16 (Interfax) - Novatek plans to build an onshore gas turbine power plant with capacity of 1,500 MW to generate electricity and support the operation of a plant to produce, store and offload liquefied natural gas (LNG) and stable gas condensate, the Russian gas producer reported. The power plant will be built in three stages.

Who is Novatek supplying liquefaction turbines?

(Photo: Novatek) Novatek has turned to a Chinese supplier of turbines for gas liquefaction after US-based Baker Hughes broke off ties last year. China-based Harbin Gungnghan Turbine will supply the turbines that will power the first two production lines of the Arctic LNG-2 project being built by Novatek, Russia's largest independent gas producer.

Will Novatek supply gas turbines for Arctic LNG-2 project?

Novatek had been looking to procure gas turbines for Arctic LNG-2 project for a year. Originally, Baker Hughes was to supply about 20 LM9000 turbines with a capacity of up to 75 MW for three of the plant's production lines.

Will Novatek complete Arctic LNG 2 by 2026?

(Source: Novatek) Novatek aims to complete all three production lines of Arctic LNG 2 by 2026 with a tentative "sail away" date for Train 3 of July 2026, company communication shows. Western sanctions have been able to delay the project, but work at the Belokamenka LNG construction center continues.

Why is Novatek building a new LNG plant in Murmansk?

The powerful company leader also underlines that the new LNG plant in Murmansk will take advantage of the major volumes of natural gas that have become available following the export cuts to the EU. With the building of the pipeline to Murmansk, Novatek challenges the gas monopoly of Gazprom.

Does Novatek supply liquefy gas?

One of Novatek's key suppliers, American industrial service company Baker Hughes, had originally been contracted to supply specialized gas turbines required to liquefy gas and also provide electricity for Arctic LNG 2. However, the latest round of sanctions required all deliveries of equipment related to LNG production to cease after May 25.
