

Solar Energy South Africa

Guadeloupe ventient energy

Overview

Why is geothermal energy important in Guadeloupe?

Geothermal energy is especially attractive since Guadeloupe is an archipelago. Production can be fully controlled, unlike photovoltaics, for example, which depends on sunlight conditions. Production costs are about half those of fossil fuel power plants and are not vulnerable to fluctuations in the world market.

How much electricity does Guadeloupe generate?

Electricity generated here accounts for 5% total generation in Guadeloupe. Cyclical phenomena brought down production between 2007 and 2010, but production has rebounded since 2013 even though major refurbishing and maintenance work have prevented the plant from reaching its maximum potential of 100 GWh.

Who are renantis & Ventient Energy?

Last summer, we announced that Renantis and Ventient Energy would join forces to form one of the largest renewable independent power producers (IPPs) in Europe. Today, we are proud to announce that this summer, the two companies will become Nadara. A reflective name for our combined business.

Who is Ventient Energy?

Founded in 2017, Ventient Energy has 2.8GW of installed onshore wind capacity and integrated energy market solutions across 145 sites. Ventient Energy ad interim CEO Kevin McCullough said: "The synergies and complementary expertise that already exist will allow us to reach as yet untapped potential."

When did geothermal power start in Guadeloupe?

Geothermal-powered electricity production began in 1996, with total production increasing to 15 MW once Bouillante 2 was brought on line in 2003.

Electricity generated here accounts for 5% total generation in Guadeloupe.

What does Ventient Energy ad's interim CEO Kevin McCullough say?

Ventient Energy ad interim CEO Kevin McCullough said: “The synergies and complementary expertise that already exist will allow us to reach as yet untapped potential. “Standing alone, our businesses are making positive steps to accelerate the energy transition and build a more sustainable energy future.
