Guinea-Bissau pt thornova solar

Overview

Does thornova solar produce solar modules in Indonesia?

Thornova Solar has started producing solar modules in Indonesia. The company says the move is in line with changing US market regulations. It plans to supply customers with modules from Indonesia or the United States by mid-2025.

Are thornova solar modules reliable?

Our management team has extensive experience in the solar industry and has established relationships with business partners in the U.S. and around the world. Thornova solar modules have proven reliability and performance, with up to 30-year performance guarantees.

Why is thornova solar moving away from Sunova solar?

As climate change is one of the most dramatic challenges of our time, with our solar modules we want to contribute to the preservation and defence of a planet worth living on. With this in mind, we have decided to move past the Sunova Solar brand and continue our future as Thornova Solar.

Thornova 580W Bifacial Solar Panel , TS-BGT72

The Thornova 580W Bifacial Solar Panel , TS-BGT72 offers an excellent 22.45% maximum efficiency. Ideal for ground-mounted solar arrays. Bifacial solar modules harvest up to 25% more PV energy from the ground-facing side. Comes in anodized aluminum alloy frame. 15 Year Product Quality & Process Warranty / 30 Year Extra Linear Power Output Warranty.

Does anyone have experience with Thornova Solar Panels?

Solar Energy Canada is a place that allows solar enthusiasts and beginners to connect and share knowledge. The solar market in Canada differs from global markets, help us bring awareness to the benefits of solar through sharing your experiences. This Thornova factory seems to have popped out of nowhere in mid March 2023, in Vietnam. How far

Thornova Solar receives PVEL Top Performer Award

The Thornova Solar module showed extremely low deviation of on average only 0.24% on the LETID stress tests that take place at 75°C and take 486 hours at Kiwa PVEL but only 162 hours for IEC 61215-2016 module certification. LETID is a phenomenon closely related to PERC cells and occurs when cells reach temperatures over 40°C during operation.
