Gundam 00 Solar Power Generation Project

Overview

A Gundam Nucleus (GN) Drive (aka solar reactor, solar furnace) is a powerful energy system within Mobile Suit Gundam 00 designed to give a mobile suit a significant advantage in combat. Invented by Celestial Being, the technology was later reverse-engineered by the Corner Family to create the GN Drive Tau.

- The number of surviving GN Drive was one of continuous retcon after the end of Season 2 and before the release of the movie. Initially, Mizushima stated that all GN Drives survived due to a special internal GN Field.
