Guyana spark power solutions

Overview

Does Guyana have a gas-to-energy project?

Kaieteur News - Three international companies from Germany, Puerto Rico and the USA have responded to a request for proposals (RFP) from the Government of Guyana for the operations and maintenance (O&M) of the Gas-to-Energy (GTE) 300-megawatt (MW) power plant project. An artist's impression of the Gas-to-Energy project.

Does Guyana have a potential for hydropower?

Guyana has significant potential for hydropower, like its neighbor Suriname which has successfully developed hydro power programs. Renewable energy is viewed as a potential solution by the GoG to reduce the cost of power and provide reliable electricity.

Is offshore wind a viable option in Guyana?

Guyana's geographic location makes offshore wind a viable alternative for renewable energy production. However, current regulatory hurdles are likely to stymie investment in this technology in Guyana.

Does Guyana's power grid need to be modernized?

Guyana's power grid is in a severe state of disrepair and needs to be modernized. Approximately 26 percent of the power generated by GPL is lost due to inefficiencies in the grid.

Why is Guyana a good place to invest?

Guyana presents opportunities for investment in renewable energy due to a lack of reliable electricity in its outlying regions. These areas, although having small populations, often have attractive natural resources and locations.

Guyana spark power solutions

Green Power Solutions now authorised dealer of SunPower panels

GREEN Power Solutions Inc. has today announced a new partnership with SunPower™, a leading manufacturer of high efficiency solar panels, to distribute SunPower™ solar technology in Guyana. Green Power Solutions Inc. is a ...
