What are Harmonics and how does it affect an Electrical

System?

The fundamental wave itself is called the first harmonic. The second harmonic has the frequency twice that of the fundamental frequency, the third has the frequency thrice that of the fundamental frequency and so on as shown below. 3rd harmonic, 5th harmonic and 7th harmonic are some of the typical harmonic content in electrical systems.

The Design of a Harmonic Radar System

A harmonic radar system works by sending out some type of stimulus signal to a specially constructed harmonic reflecting tag. The tag takes in stimulus energy at a lower frequency and generates a second harmonic of that frequency that is then re-radiated back out to a receiving system. The receiving system then processes this data and can extract
