# How to install photovoltaic panels on brick and tile roofs

## Overview

---

Can I install solar panels on a concrete tile roof?

Some companies may tell you that you can't go solar or that they won't do the install, but that is not the case. If you have a concrete tile roof, there are two common ways to go about installing solar panels on a concrete tile roof. First, your installer can put S-hooks under the tile for your system to be mounted on.

How do I install roof-integrated solar panel roof tiles?

Roof-integrated solar panel installation is a simple process with Marley SolarTile® - just secure the fixings, place the first tile, push-fit additional tiles and then attach final fixings and flashings.

Should you install solar tiles on your roof?

"If you are removing or replacing the tiles you may choose to use solar tiles," says David. "The solar cells are built into the tiles or slates and mounted on the roof as if they were normal tiles or slates. Although not completely invisible these solar solutions can be much better aesthetically than the larger panels.

How do I mount solar panels to my roof?

Here are some mounting solutions: Tile hooks: Tile hooks provide a direct attachment method for securing solar panels to the roof by affixing them to the roof tiles. This method is commonly employed on clay tile roofs— requiring the installation of specialized hooks attached directly to the tiles.

How are solar panels installed?

The installation consists of directly securing the solar panels to the roof structure without affecting or penetrating the tiles. Rail-based systems: Rail-based systems use horizontal rails running across the roof, providing a versatile and adjustable platform for mounting solar panels.

Can solar panels be installed on a roof?

"The solar panels will need to be mounted on the roof by installers who understand roofing and will need some scaffold decks to safely get the panels to the roof.
