.

Should you hire a certified solar panel installer?

Your solar panel system installation should be quick, efficient, and minimally disruptive to your life and home. To make sure your panels go up without too much fuss – and are set up to generate the most electricity possible – you should hire an accredited, certified installer, like Sunsave.

How do you install solar panels on a roof?

Start with a solid foundation, which is essential to add solar panels to a roof or

a ground platform. For roof installation, lag bolts are attached to the rafters, and a piece of flashing is used on top of the shingles to prevent leaks. The flashing slides under the shingle wherever a lag bolt installation occurs.

How does a solar panel installation work?

The installer will have to lift some of the roof tiles to fix the anchors to the rafters in the loft. This will give the solar panel mounts a stable foundation, and will make sure they don't get damaged in stormy weather. Once the roof anchors have been fixed to the property, the installer will attach the solar panel mounting system to them.
