## 12.8V 200Ah

## Overview

---

ToolsStep 1: Find the Best Tilt Angle for Your Location .

The PlansStep 1. Cut PVC to Length Here's all the measurements in list form: .  
Step 2: Assemble and Test Fit the Pieces . How to install a solar panel bracket?

To install a solar panel bracket, apply adhesive to the upper side of the bracket (this is where the solar panel will be positioned). Position and press firmly the side bracket along the side of the solar panel and repeat this process with the other side bracket. Allow the adhesive to dry as per the product specifications.

How do solar panel brackets function?

Solar panel brackets function by being installed through fastening bolts or applying adhesive on the mounting rails onto a flat surface. Solar panels should be installed at an angle to allow the cells to receive as much sunlight as possible.

How do I build a DIY solar panel stand?

The first step when building your DIY solar panel stand is to determine the proper angle for your panels. This will depend on your location and the amount of sunlight your panels will receive. Once you have this information, you can begin designing your stands and gathering the necessary materials.

How do you attach a solar panel to a wall?

Mark where you want to attach your triangle brackets to the wall. Use a tape measure to make sure they're installed as far apart as your solar panel is wide. Screw the brackets to the wall, using a level to make sure they're vertical. I used two screws per bracket — one at the top and bottom of the vertical side. Here's a video of this step:.

How do you mount a solar panel?

Now only one thing left to do — attach the solar panel. Measure the distance between the mounting holes on the back of your solar panel. Use this distance to mark where to attach the mending plates. Screw the mending plates to the angled side (the hypotenuse) of the brackets. Attach two plates per bracket, oriented inward.

How do you attach mending plates to a solar panel?

Measure the distance between the mounting holes on the back of your solar panel. Use this distance to mark where to attach the mending plates. Screw the mending plates to the angled side (the hypotenuse) of the brackets. Attach two plates per bracket, oriented inward. Here's a video illustrating what I mean:
