How to pay for solar panels

Overview

How much do solar panels cost?

The price of a typical 3.5 kilowatt-peak PV solar panel system is about £7,000. Based on the Energy Saving Trust's figures, it could take someone living in the middle of the country, in a typical home, anywhere between 12 and 17 years to recoup the costs of installing panels, based on current Energy Price Cap rates.

How do I earn money from my solar panels?

To earn money from your solar panels you need to apply to join the SEG. It requires electricity suppliers who are registered with the scheme to pay small-scale generators of low-carbon electricity for any energy they export back to the National Grid.

How much do solar panels save on electricity bills?

We've seen how much solar panels save on electricity bills. Now let's look at their investment value. Taking the average installation cost of £5,000 for a system this size, with £678 in revenue the Year 1 nominal rate of return will be 6.6%. We can then use this figure to project your solar panels' return on investment going forward.

How much does a solar panel cost in the UK?

The average cost of a solar panel system for a typical three-bedroom house in the UK is £9,600, including a battery. ☐Solar panels can save you up to £1,014 annually, totalling nearly £30,000 of savings over their lifespan. ☐Adding a solar battery can boost your energy savings by up to 90 per cent.

How do I finance a solar PV installation?

The most cost-effective way to finance the installation of solar PV panels is to pay in full using your own savings. If you're unable to pay upfront, you could consider a loan or remortgaging.

Why do solar panels cost so much?

Solar panel quality significantly impacts their cost. Higher-quality panels, made with superior materials and advanced technology, offer greater efficiency, longer lifespans, and better warranties. This higher upfront cost is justified by increased energy production and durability, leading to greater long-term savings and reliability.
