How to pay tax on solar power generation

Overview

You need to have a renewable electricity generating system that meets the SEG eligibility requirements. You must have a meter capable of providing half-hourly export readings. This would typically be a smart meter. Speak to your energy supplier about getting a smart meter installed if you do not already have one.

You need to apply directly to a SEG tariff supplier to get paid. The OFGEM website lists the energy suppliers that provide SEG tariffs. Your SEGtariff supplier does not need to be the same as the supplier that provides your energy.

Use the Energy Saving Trust calculator to estimate: 1. how much you could save from solar panels or other renewable electricity generating.

How can I get paid for solar panels?

Additionally, Good Energy launched a new scheme in October 2024, which helps you get paid for the certificates (REGOs) produced when your solar panels generate electricity. Energy suppliers buy them to show that the electricity they sell is renewable.

How much do solar panels cost to export?

Find out which energy companies have the best rates. The amount you can get paid for exporting energy from your solar panels varies from a paltry 1p to as much as 40p per kWh. That means that if you've got solar panels, choosing the best export tariff could earn you hundreds of pounds extra in payments every year.

Do I have to pay income tax if I generate electricity?

Where the generation tariff is received by an individual, other than in a business capacity, and it is not chargeable as miscellaneous income, no Income Tax liability will arise. This will usually be the case where an individual generates electricity mainly for use in their own home.

Do solar panels have a Smart Export Guarantee (SEG)?

The good news for solar panel owners is that large energy companies are obliged to pay for the excess energy that is exported, under the Smart Export Guarantee (SEG) scheme. What is the Smart Export Guarantee?

.

Will new solar homes get a payment from suppliers?

New solar homes and businesses creating and exporting electricity to the grid will be guaranteed a payment from suppliers under new laws to be introduced by the government this week (Monday 10 June).

Does fit pay for solar panels?

The FIT scheme still pays many solar panel owners for the electricity they generate at home, but it is closed to new applicants. All large energy suppliers - with more than 150,000 domestic electricity customers - must participate in the SEG. Smaller suppliers can choose to offer solar export tariffs too.
