# How to record the purchase of photovoltaic panels by Party A

## Overview

---

What is a solar power purchase agreement (PPA)?

Home » Solar Power Purchase Agreement (PPA) Explained: A Comprehensive Guide In the dynamic landscape of renewable energy, the Solar Power Purchase Agreement (PPA) has emerged as a game-changer, offering individuals and businesses a pathway to harness solar power without the burden of upfront costs.

What is a solar PPA & how does it work?

The duration of the Solar PPA outlines the length of time the property owner will purchase solar electricity from the provider. Longer-term agreements may offer more favorable rates, providing stability and cost-effectiveness over an extended period. Shorter-term agreements offer flexibility but may have higher rates.

Can a person own a solar PV installation?

While an individual can own the solar PV panels installed at their property, there are instances where the owner of an installation may be different from the owner of the property or site at which the installation is located.

Are solar PV installations sold between companies?

However, we are aware that in some instances solar PV installations are sold between companies, especially when companies go out of business. This change in ownership may not be communicated to the homeowner.

How do I choose a solar PPA?

The journey to a Solar PPA begins with research and the selection of a reputable solar energy provider. Consider factors such as the provider's track record, customer reviews, and commitment to using high-quality components.

2. Site Assessment Once a provider is chosen, a thorough site assessment is conducted.

Can a third party install solar panels on a property?

The most common arrangement is that the third party installs solar PV panels on the property. The homeowner then receives the electricity generated (lowering their electricity bills) and the third party owner of the installation receives any associated subsidies, in this instance, FIT generation and export payments.
