How to Store Solar Energy – A Detailed Guide  
Is battery storage a good way to store solar energy?

Thankfully, battery storage can now offer homeowners a cost-effective and efficient way to store solar energy. Lithium-ion batteries are the go-to for home solar energy storage. They're relatively cheap (and getting cheaper), low profile, and suited for a range of needs.

Does battery storage work with a solar panel system?

Adding battery storage to work in conjunction with a solar panel system allows you to use more of the renewable electricity generated and reduce reliance on the grid. For example, you could store electricity generated via your solar panels during the day to then use at night.

What is solar battery storage & how does it work?

Together with solar panels, solar battery storage allows you to store and use more of the renewable energy they generate, reducing your electricity bills and carbon footprint. So what is it and how does it work?

On average, solar batteries cost around £4,500 and typically last 10 to 15 years.

Is it worth getting a solar storage battery?

A solar battery allows you to store electricity produced by your solar panels and use it later or, in some cases, sell it back to the grid to make a few quid – but they're not cheap. Read on to see if it's worth getting a solar storage battery for your home. This is the first incarnation of this guide.

How do I choose a solar battery storage system?

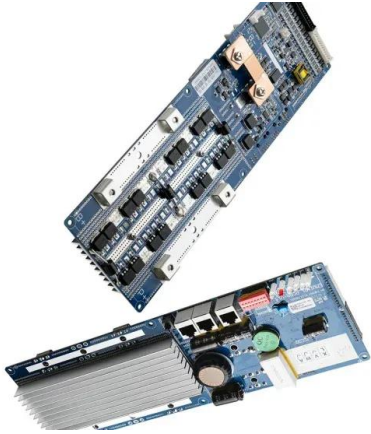

When choosing and installing a solar battery storage system, make sure your installer is signed up to the Renewable Energy Consumer code (RECC) or the Home Insulation and Energy Systems Contractor Scheme (HIES), as this means you'll be covered should you need to make a complaint or claim.

How do you store energy?

You can store electricity in electrical batteries, or convert it into heat and stored in a heat battery. You can also store heat in thermal storage, such as a hot water cylinder. Energy storage can be useful if you already generate your own renewable energy, as it lets you use more of your low carbon energy.
