# Hungary bees battery

## Overview

---

Why is Hungary a good place to buy a battery?

Hungary is ideally located on the European battery map, thanks to its central geographical location, investments in cell and battery production facilities, the presence of large car manufacturers and its extensive supplier industry.

Who manufactures Car batteries in Hungary?

GS Yuasa also produces automotive lithium-ion starter batteries, while Inzi Control also manufactures battery modules. Many of the significant suppliers of the battery industry in Hungary are located directly near the main car manufacturing plants.

Where is the battery industry located in Hungary?

Many of the significant suppliers of the battery industry in Hungary are located directly near the main car manufacturing plants. Since 2016, a total of HUF 1,903.8 billion (EUR 5.29 billion) and approximately 13,757 jobs have been created as a result of working capital investments in the battery industry.

Will Hungary become a key producer of electric vehicle batteries?

Hungary wants to become a key producer of electric vehicle batteries. Government spending has attracted investments, including a new Chinese gigafactory.

What is the Hungarian battery value chain strategy?

Based on the situation analysis presented above, the vision of the Strategy, which takes the form of a long-term concept, is to support the establishment of a Hungarian battery value chain based on high value-added services and production in Hungary, as well as a joint value creation by international and national operators.

Is battery production the key to economic development in Hungary?

“The Hungarian government thought that battery production is the key to economic development, where they can invest without risk, and the supply will grow increasingly and continuously,” Dóra Gyórfy, economist and university professor, tells Euronews Green. “But this doesn’t make sense.
