I want to install solar power at home

Overview

How to install solar panels?

Make space for the solar panel accessories (solar inverter, cables and solar batteries, if desired), for instance in a plant room 4. Plan a day for installation 5. Erect the scaffolding (this can be done by your supplier or by a company you organise) 6. The solar panel mounts will be installed 7. The professionals will install the solar panels 8.

Do solar panels need to be wired before installation?

Without fastening them at first, the installers will place the solar panels onto the mounting system. Once the correct angle is achieved, the panels are fastened with bolts. Your solar panel will most likely be pre-wired before installation, meaning that the wiring process can be skipped.

Can solar panels be installed on a house?

If you're getting solar panels installed onto the roof of your house, the installers will need to construct scaffolding around the building before they can crack on with the process. This will take the most time out of all the steps - usually about a day - but will mean the installers can have safe and secure access to the roof.

Do I need permission to install a solar panel?

Under Permitted Development Rights, you won't require formal permission to install a solar panel. However, you will need to check if your home is not exempt under Article 4 of PDR. In a process that takes less than a day, your panel will be fastened to your roof and connected to your home's electricity grid.

Can you install solar panels on a flat roof?

The DNO is the company responsible for bringing electricity to your home. Usually, your installer will register the device for you. Yes, it's okay to install

panels on flat roofs. Solar panels work best when angled towards the sun, so panels on flat roofs are normally tilted up to help maximise energy production.

Should you buy or rent a home with solar panels?

With 69% of people telling our National Home Energy Survey that they're likely to buy or rent a home with solar panels, now is a great time to go solar. And if you're ready to get solar panels on your roof, it's never been simpler to compare prices with our easy-to-navigate tool.
