Surya Utama Nuansa PT. Sumber Energi Sukses Makmur PT.

Could foreign companies be involved in Indonesia's solar power growth?

The project was a joint venture between Indonesia's state utility company and

Masdar, a United Arab Emirates-based renewable energy company. It highlights the potential for foreign companies to be involved in Indonesia's solar power growth and signals a favourable regulatory and economic climate for investors.

Does Indonesia have a potential for solar energy?

Cirata Reservoir floating solar power plant. Source: Solar Industry Indonesia has significant potential for solar energy. However, it has remained largely untapped. The country's 2030 and 2060 decarbonisation goals heavily rely on the industry's rapid expansion. The capacity of solar energy in Indonesia is steadily climbing.

What is Indonesia's solar energy plan?

This progress is part of Indonesia's solar energy plan, which targets 5 GW of installed capacity by 2030. The growth of solar power in Indonesia reflects not just a commitment to shift away from its fossil fuel-dominated energy system but also recognises the immense potential the solar energy holds in the Indonesian archipelago.

Can Indonesia harness solar energy?

While solar energy capacity is increasing in Indonesia, the current installed capacity is just a fraction of the potential capacity of solar power development. As a nation that straddles the equator, it gets direct, high-intensity solar irradiance, putting it in an ideal position to harness solar energy.

Who are the fastest growing solar companies in Indonesia?

One of the fastest growing companies in Indonesia, they currently have a portfolio of over 30 MWp solar projects, only 4 years into operation. They have completed more than 3000 residential solar installations to date. Based in Jakarta, ATW Solar also has a Solaristic Showroom powered by solar panels.

Indonesia no 1 solar company in the world
