## Overview

---

Is Indonesia's energy transition progress stalled in 2024?

Jakarta, December 5, 2024 – The progress of Indonesia's energy transition throughout 2024 has stalled. The government's move to revise the National Energy Policy has actually lowered the target for achieving renewable energy from 23% to 17-19 percent in 2025. Indonesia's energy transition status has not moved from the consolidation stage.

Will Indonesia reach net zero emissions by 2060?

Our analysis is centred on the IEA's Announced Pledges Scenario (APS), in which Indonesia reaches net zero emissions on an economy-wide basis by 2060, with deep cuts in energy sector emissions. The report also develops an accelerated scenario, the Net Zero Emissions by 2050 Scenario (NZE).

How has Indonesia's Energy Supply changed in 2021?

Indonesia's total energy supply increased nearly 60% from 2000 to 2021. As energy demand rose, coal stepped in to fill the gap. Per unit of energy consumed, its energy sector now emits one-third more CO<sub>2</sub> than in 2000. Total energy sector emissions have grown faster than energy demand, more than doubling over the last two decades.

How much CO<sub>2</sub> does Indonesia emit per capita?

Yet, per capita energy CO<sub>2</sub> emissions are only 2 tonnes, half the global average. Indonesia's ambitious target of reaching net zero emissions by 2060 or sooner is an integral part of its overarching development goal of becoming an advanced economy by 2045. Despite the country's achievements, a long path to this stated goal remains.

Does Indonesia need to decarbonize its energy supply?

The energy supply sector also needs to immediately decarbonize. Currently, Indonesia's energy system is dominated by fossil fuels up to 80 percent, with

the largest portion of coal at around 40 percent. This dependence on fossil fuels makes Indonesia quite vulnerable to the global geopolitical situation.

What happens if Indonesia doesn't have a demand for energy?

Without demand, supply will decrease, and the economy will weaken,” said Farid The energy supply sector also needs to immediately decarbonize. Currently, Indonesia’s energy system is dominated by fossil fuels up to 80 percent, with the largest portion of coal at around 40 percent.

### Executive summary - An Energy Sector Roadmap to ...

Energy efficiency, renewables in the electricity sector, and the electrification of transport need to be kick-started now. To 2030, these three levers provide around 80% of the emissions reductions from the energy sector needed to put ...

### Michael Everett Joins Zeta Energy as Chief Operating Officer

HOUSTON, May 2, 2024 /PRNewswire/ -- Zeta Energy, a Houston-based company that has developed a world-leading lithium-sulfur battery, announced today that Michael Everett will join Zeta as Chief

### Luncurkan Peta Jalan NZE Sektor Energi Indonesia, ...

Kementerian Energi dan Sumber Daya Mineral (ESDM) bekerja sama dengan International Energy Agency (IEA) merumuskan peta jalan (roadmap) Net Zero Emission sektor energi Indonesia di tahun 2060. Bukti ini ...

### Stellantis, Zeta Energy ink deal to develop lithium-sulfur EV batteries

3 ???· Zeta Energy's battery technology can also be produced on existing gigafactory manufacturing lines. Without the reliance on critical raw materials, producing lithium-sulfur batteries would

## Stellantis and Zeta Energy to develop lithium-sulfur EV batteries

1 ??· Netherlands-headquartered automaker Stellantis and US battery technology firm Zeta Energy have signed a joint development agreement to develop lithium-sulfur EV batteries that have energy density comparable to that of lithium-ion technology. The collaboration includes pre-production development and planning for future production. Stellantis aims to use the batteries ...

## Stellantis, Zeta Energy Developing Lithium-Sulfur EV Batteries

2 ???· Stellantis N.V. and Zeta Energy Corp. have announced a joint development agreement aimed at advancing battery cell technology for electric vehicle applications. The partnership aims to develop lithium-sulfur EV batteries with gravimetric energy density while achieving a volumetric energy density comparable to today's lithium-ion technology, the companies stated in a press ...

## Vestia Zeta is the #1 waifu in Indonesia : r/Hololive

Zeta is in my opinion the "perfect storm" when it comes to being attractive. Looks young, but not child-like; perfect mix of beautiful and cute. Very nice proportions without feeling exaggerated. An outfit that's just the right amount of revealing. A voice that's absolute peak. A personality with very strong "cheeky girlfriend" energy.

## Batteries lithium-soufre : Stellantis s'associe à Zeta Energy

Stellantis-Zeta Energy : la production de batteries débutera en 2030. Dépourvus de matériaux rares (cobalt, graphite, manganèse, nickel), les packs lithium-soufre utilisent notamment des matériaux recyclés, du méthane et du soufre non raffiné. Ce dernier élément chimique est à la fois économique et largement disponible.

## Stellantis, Zeta Energy ink deal to develop lithium-sulfur EV batteries

1 ??· Dive Brief: Stellantis and Texas-based battery manufacturer Zeta Energy will jointly develop advanced lithium-sulfur battery cells for use in the automaker's future electric vehicles, the companies announced Dec. 5. Lithium-sulfur batteries offer roughly double the energy density compared to the lithium-ion batteries used by automakers in many EVs today, and have the ...

## Stellantis and Zeta Energy to collaborate to develop Lithium

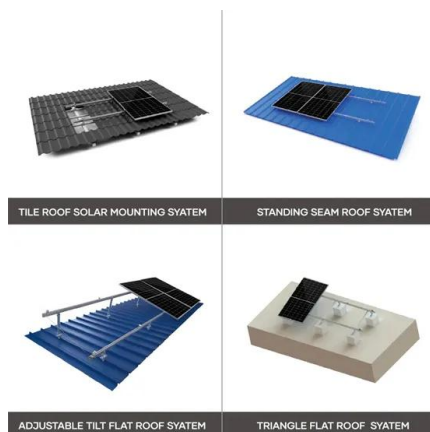

...

Stellantis N.V. and Zeta Energy announced a joint development agreement aimed at advancing battery cell technology for electric vehicle applications. The partnership aims to develop lithium-sulfur EV batteries with high gravimetric energy density while achieving a volumetric energy density comparable to today's lithium-ion technology. For customers, this ...

## Zeta Energy Demonstrates Industry-Leading Progress in Lithium ...

HOUSTON, Oct. 23, 2023 /PRNewswire/ -- Zeta Energy announced today that it has demonstrated a multilayer 300 Wh/kg pouch cell with up to 20 Ah. Zeta Energy's cells use an innovative lithiated

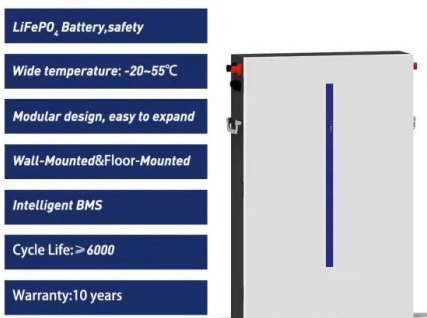

## Stellantis, accordo con Zeta Energy per sviluppo batterie litio ...

MILANO (Reuters) - Stellantis (BIT: STLAM) e Zeta Energy hanno annunciato un accordo di sviluppo congiunto per far progredire la tecnologia delle celle a batteria per applicazioni su veicoli elettrici. Secondo quanto si legge in una nota congiunta, la partnership punta a sviluppare batterie per Ev al litio-zolfo "con una rivoluzionaria densità energetica ...
