Inman solar Tunisia

Highvoltage Battery

Overview

Can Tunisia build a large-scale solar project?

Tunisia's Ministry of Industry, Mines and Energy has kicked off a new procurement exercise for large-scale solar. Tunisia's Ministry of Industry, Mines and Energy has launched a tender for the construction of several large-scale PV projects with a combined capacity of 200 MW.

What is the Tunisian Solar Plan?

The Tunisian Solar Plan contains 40 projects aimed at promoting solar thermal and photovoltaic energies, wind energy, as well as energy efficiency measures. The plan also incorporates the ELMED project; a 400KV submarine cable interconnecting Tunisia and Italy.

Who is Inman solar?

Inman Solar is both an Owner/Operator of solar farms as well as a trusted partner to many investors. Because of our EPC experience, and financing capabilities, we often can create value for investors above and beyond what a developer can alone. Let's start a conversation and see how we can work together.

How does Inman solar work?

Inman Solar starts with a comprehensive engineering process that utilizes our extensive experience on a large variety of project sizes, and configurations. We then optimize our design through value engineering the design as well as utilizing our vendor relationships.

Where is the first large scale solar power plant in Tunisia?

The first large scale solar power plant of a 10MW capacity, co-financed by KfW and NIF (Neighbourhood Investment Facility) and implemented by STEG, is in Tozeur. TuNur CSP project is Tunisia's most ambitious renewable energy project yet.

Does Tunisia support solar?

Tunisia is supporting utility-scale solar through a series of tenders, the latest of which was launched in January 2023. It also finalized a 500 MW solar tender in December 2019. The country's cumulative installed PV capacity stood at just 506 MW by the end of 2023, according to the International Renewable Energy Agency (IRENA).
