Innolith energy battery Bonaire Sint Eustatius and Saba

Overview

What is innolith I-state battery technology?

Innolith developed the platform which will be manufactured through licensing agreements with automotive, industrial and battery companies with further details to be announced. I-State cells use a new battery technology based on liquid inorganic electrolyte that can operate at higher voltages than traditional Li-ion battery cells.

What is innolith e-mobility battery technology?

Innolith runs one of the world's leading battery cell research programs at its R&D Center in Bruchsal, Germany, where it is pioneering a next generation e-mobility battery technology based on a proprietary electrolyte that delivers cells with lower cost, high energy density along with higher safety and temperature performance.

Is innolith I-state a good electrolyte?

Innolith claims its I-State platform is "well suited for applications that require both high energy and high power". This is achievable due to the electrolyte's "exceptionally" high conductivity, up to four times that of conventional Li-ion electrolytes.

How much does energy cost in Bonaire?

This profile provides a snapshot of the energy landscape of Bonaire, a special municipality of the Kingdom of the Netherlands located on the coast of Venezuela. Bonaire's utility rates are approximately \$0.35 per kilowatt-hour (kWh), above the Caribbean regional average of \$0.33/kWh.

What is innolith battery cell technology?

The Innolith battery cell technology is based on the proprietary liquid inorganic electrolyte that can operate at up to 5 volts without degradation, unlike the Li-ion batteries in use today that are limited to 4.2 volts. This gives

the batteries higher gravimetric energy density of 300 Wh/kg and volumetric energy density of 825 Wh/L.

Why is innolith launching a new EV platform?

Additionally, Innolith further announces that new technologies based on the I-State platform are in development to provide for both increased EV range with 350-400 Wh/kg energy densities, and for lower-cost EVs with lower CO₂ footprint due to reduced use of expensive green metals versus existing commercial cells in the market.

EU selects Bonaire, Sint-Eustatius and Saba as front-runners in energy ...

Bonaire, Sint-Eustatius, and Saba are in the selected group of 30 islands chosen by the European Union (EU) to participate in the '30 for 2030' project. The islands, which were selected after an extensive selection process, can count on intensive support from the EU to realize their ambition to have fully sustainable energy facilities by 2030.

Bonaire, Sint Eustatius, Saba Complete Travel Guide

Reaching Bonaire, Sint Eustatius, and Saba usually starts with a flight to one of the larger neighboring islands, such as St. Maarten, before taking a smaller regional aircraft into the islands' respective airports: Flamingo International Airport in Bonaire, F.D. Roosevelt Airport in Sint Eustatius, and Juancho E. Yrausquin Airport in Saba.

Nieuwe milieuregels van kracht op Bonaire, Saba en Sint Eustatius

KRALENDIJK - Vanaf 1 april worden op Bonaire, Saba en Sint-Eustatius nieuwe milieuregels van kracht die als doel hebben de kwetsbare natuur en koraal-ecosystemen beter te beschermen. Deze regels zijn onderdeel van de wet Vrom Bes en het Inrichtingen- en activiteitenbesluit BES (IAB BES), waarin staat dat lokale besturen een eigen toezicht- en
