Overview

How do I install a campervan Solar System?

To install a campervan solar system, you need three components: How do solar panels work?

Photovoltaic panels (PV), also known as solar panels convert energy from the sun (photons) into electricity which you can use to power your campervan. When the sun shines onto a panel, the energy is absorbed by the PV cells.

How do you install solar panels on a van?

After you mount your solar panels, you need to get the wiring inside your van. This means drilling a hole in your van to feed the wires through. To prevent water from penetrating, make sure to cover up the hole with a solar entry gland. To attach the entry gland to the roof, use 3M VHB tape and seal it up with Dicor lap sealant.

Do you need solar power for a campervan conversion?

Solar power for van conversions is totally essential. In the Roaming Home 2023 study we found that 78% of people install a campervan solar system. In this we will learn how solar panels work and how to choose the right solar panel kit. We will also look at campervan solar panel installation.

Can a solar system be installed on a van conversion?

Like the other core systems, proper planning will save loads of time and money when it comes to the installation of your solar system on your van conversion. We'll take you through every step of the process and do everything we can, short of climbing up on your roof rack and hooking up the panels ourselves!.

What are solar panel kits for van conversions?

Solar panel kits for van conversions include everything you need to set up

your solar system: panels, charge controller, mounts, cables, sealant and all the components and connectors to make it work. All our kits come with full fitting instructions and our expert team of installers are only a phone call away should you need help.

Can flexible solar panels be installed on a metal van roof?

Flexible solar panels are a lightweight alternative to rigid solar panels. They install best on fiberglass roofs with double sided VHB tape on the underside and/or eternabond around the perimeter. Although you can install them on metal van roofs, we don't recommend doing so unless absolutely necessary.
