CEO Spotlight: Brenmiller Energy Is Bringing Thermal Energy Storage

Brenmiller Energy's bGen(TM) ZERO technology addresses a critical need in the market for efficient and sustainable thermal energy storage, which is particularly appealing to industries looking to reduce their carbon footprint. This aligns well with global decarbonization efforts, making their products highly relevant in today's environmental and regulatory landscape.

'Sand-based battery' thermal energy storage project ...

Sand-based energy storage was in the news recently with the inauguration of an 8MWh project in Finland that stores heated sand in a cylindrical tower to be used for district heating, through tech startup Polar ...

Brenmiller Installs Thermal Energy Storage at SUNY Purchase ...

The bGen thermal energy storage-based co-generation system (TES) was completed by Brenmiller and developed in partnership with the New York Power Authority. Using exhaust gas and electricity from an on-site combined heat and power microturbine, the bGen TES is expected to eliminate close to 550 metric tons of greenhouse gas (GHG) emissions

'Sand-based battery' thermal energy storage project in Italy

Sand-based energy storage was in the news recently with the inauguration of an 8MWh project in Finland that stores heated sand in a cylindrical tower to be used for district heating, through tech startup Polar Night Energy. Brenmiller to have thermal storage 'gigafactory' this ...

Brenmiller inaugurates 'world-first' thermal energy storage

...

Avi Brenmiller, founder and CEO at Brenmiller Energy, said: "Unveiling our TES (thermal energy storage) gigafactory marks a pivotal milestone in our company's history: what started as a family business has grown into a company that can help the global economy's efforts to decarbonise, and we believe our gigawatt-scale production capacity

Brenmiller Energy Secures Funding and Strengthens Leadership ...

Brenmiller Energy Ltd. (Nasdaq: BNRG), a notable player in the thermal energy storage (TES) sector, is navigating a critical phase in its corporate journey marked by financial maneuvering, compliance notifications from Nasdaq, and leadership changes. On August 30, 2024, the Israeli-based company announced the successful raising of approximately \$2 ...

Inaugurated World's First-Ever Gigafactory for Thermal Energy Storage--Expected 4 GWh of Capacity by Q4 2023; Signed Term Sheet with Leading Global Clean Energy Utility to Decarbonize Heat and

TECHNOLOGY

TECHNOLOGY Brenmiller's bGen(TM) thermal energy storage technology uses crushed rocks to store heat at high temperatures. Similar to electric batteries, renewable energy or grid electricity is used to heat the storage media up to 650°C. Heat is stored for hours or days later until the start of discharge, where water is circulated in carbon-steel pipes [...]

Projects

Our Projects TEMPO PV & Grid Electricity to supply saturated steam to Tempo, a producers and distributors of beverages for brands including Heineken and Pepsi. bGen ZERO will be installed at Tempo's beverage plant to generate sustainable process steam using off-peak electricity and solar PV, mitigating over 6,200 tons of carbon emissions each year PPF [...]
