## Overview

---

### Who is Island energy services?

Learn about Island Energy Services, an energy company headquartered and managed in Hawai'i. Meet the veteran industry professionals who are leading Island Energy Services into the future. Read about Island Energy Services in the news.

### Can energy Islands be used as energy distribution hubs?

Initially, many energy island concepts will mainly serve as electricity distribution hubs. However, there is a growing need to convert renewable-based power to molecular fuels, to supply clean energy to sectors such as industrial heating, maritime shipping, or aviation that have few alternatives to decarbonize.

### Can energy islands support the production of off-grid renewable electricity?

This feature article draws DNV's picture of how energy islands could support the production of off-grid renewable electricity and the decarbonization of hard-to-abate sectors, through supporting hydrogen and other e-fuel production.

### Are energy Islands a viable solution for a decarbonized energy system?

A significant advantage of energy islands is the connectivity to different end uses and thus flexibility in providing the future solution for a decarbonized energy system, may it be through renewable electricity, low-carbon hydrogen, synthetic fuels such as electricity-based ammonia or all of the above.

### Can energy islands help decarbonize the grid?

Regions such as Greater China are prioritizing employing energy islands to generate renewable power to decarbonize the grid, whereas Europe is focused on both grid decarbonization and dedicated hydrogen production. Initially, many energy island concepts will mainly serve as electricity distribution hubs.

Why are hydrogen energy Islands a good option?

For hydrogen energy islands, it is the potential to transport energy as both electricity and molecules that is an advantage – determining the best option based on distance, infrastructure, end use and other considerations.

### [Offshore energy islands](#)

Energy island potential is underpinned by strong outlook for producing hydrogen from dedicated (or off-grid) renewables Germany, and Poland. Similar to the project planned off the west coast of Denmark, the initial focus is on green electricity with a possible additional production of green fuels such as hydrogen or ammonia in the future

### Safety

Island Energy Services was founded on Hawaiian core values of Kina'ole (always doing the right thing), Aloha (love, respect), Lokahi (unity, teamwork), Ho'ohana (purposeful and important work). Those values define how we engage with our customers, our stakeholders, and the island communities.

### [island-energy](#)

Island Energy has recently acquired Vineyard Oil, the heating oil and diesel business of AmeriGas. We welcome our new customers and look forward to meeting their fuel and service needs. Please note: Island Energy's new offices are located at 7 North Line Road at the MV Airport Business Park. Our mailing address remains the same.

### About Us

Headquartered on O'ahu, Island Energy Services

delivers fuel to O'ahu, Maui, Hawai'i Island and Kaua'i through a network of retail locations. Island Energy is the official licensee of the Texaco brand in Hawai'i. We know that whatever kind of driver you are, you love your car. That's why we're proud to bring you high-quality
