Go Green: Isle of Man, promoting green living through ...

The Isle of Man is home to many palm trees, normally growing in Southern Europe, they find

the mild Manx climate well suited, as air temperatures rarely drop below zero. Heat pumps are also well suited to the Manx climate, which has an average annual temperature of 10°C, in comparison the UK's average temperature is 7°C.

Solar Farm Plan Submitted - Gef - Isle of Man

'The solar farm would generate enough power to meet more than 7% of the Isle of Man's current electricity demand and support the Government's aim for electricity on the Island to be 100% green by 2030.' The project represents an investment of around £30m across the 40-year anticipated life of the project, with no public investment.

Douglas council to build solar energy farm

Douglas council is to start producing its own sustainable solar energy. The local authority has approved funding for a solar farm to power some of its facilities. The generation facility would be built in Braddan and have a life span of around 20 years. It's thought the savings will mean it'll effectively pay for itself within five to seven years.
