Overview

Who is Solarity Jordan?

complete information about products. so that you don't miss any news!
Solarity Jordan is a distributor and solutions provider of photovoltaic (PV) systems offering a complete assortment of solar modules and inverters.

Will Jordan build a solar power plant?

The idea, first announced a year ago, is for Jordan to build 600 megawatts of solar power capacity that would be exported to Israel. In return, Israel would provide water-scarce Jordan with 200 million cubic metres (mcm) of desalinated water.

What is the solar energy potential in Jordan?

The solar energy potential in Jordan is enormous as it lies within the solar belt of the world with average solar radiation between 4 and 8 KWh/m², which implies a potential of 1400-2300 GWh per year annually.

How do solar panels produce electricity?

The renewable solar panels produce electricity by transforming the continuous flow of energy from the sun to electricity. They are CO₂-free. No harmful emissions are released into the air when electricity is produced by solar panels. Additionally, the photovoltaic process has low operating costs.
