Langa energy Lithuania

Overview

Which power plant provides energy storage in Lithuania?

Kruonis Pumped Storage Plant provides energy storage, averaging electrical demand throughout the day. The pumped storage plant has a capacity of 900 MW (4 units, 225 MW each). Kaunas Hydroelectric Power Plant has 100 MW of capacity and supplies about 3% of the electrical demand in Lithuania.

Who is responsible for natural gas transmission in Lithuania?

AB Amber Grid, the Lithuanian gas transmission system operator, is responsible for the safe and reliable transmission of natural gas through high-pressure pipelines. Natural gas companies in Lithuania include Lietuvos Dujos and Ignitis. In 2021 Lithuania used coal to generate 2% of the country's electricity.

Why is Lithuania investing in alternative energy import routes?

This is because ever since the reestablishment of its independence, Lithuania has been investing in alternative energy import routes. These included the development of the Būtingė oil terminal, the electricity interconnections NordBalt and LitPol Link, the Klaipėda LNG terminal and the Gas Interconnection Poland-Lithuania.
