How come my electric company says I'm producing

For example the app says my system produced a thousand kilowatts a month but the electric company says I only generated 500 KW. So now I owe them money because I had to use their electricity and not my own. Hello @Ragsdale_7117, Here is an article to help you understand the difference between the data reported by your Enphase app and your

Enlighten App shows more production than local electric company ...

Solar Panel Newbie here I'm trying to understand how much electric I'm producing Vs consuming and I'm noticing a huge difference in numbers between the enlighten app and my bill. For example my last billing period states that I delivered 464 Kwh back to the power company. When I put the same dates into the Enlighten app is informs me that I produced 1.3 Mwh.

Northland Capmk Weighs in on Enphase Energy Q1 Earnings

Why won't this company service my system?

My system has been on-line since 4/2022, has only worked properly for that month. Since discovering a problem with my system I've been

calling for a repair tech to come out to service my system which of course is under warranty, for a month now and they still have yet to comply. What will it take to get this company to service my system? The problem is that one ...

How do I add a company logo to my customers

If your administrator entered your company's website URL, then the logo will link to that URL. To add a company logo (must be the company administrator): Select the Account tab. On the left panel, click Company Information. In the Logo panel on the right-side of the Company Information page, use the file selector to upload your logo image. The

Net export on app vs what utility company says : r/enphase

I'm looking at my electric company's website for my daily usage. There is a discrepancy between what they say I exported and what Enphase's site states. For example, on 6/2 my utility company says I exported 29 kwh while Enphases has me sending off 39.9 kwh. I checked other days, and the power company typically shows fewer kwh exported than
