Ltm energy Poland

Overview

Will LSEZ build a power plant in Poland?

US small modular reactor developer Last Energy has signed a Letter of Intent with Poland's Legnica Special Economic Zone and DB Energy on the construction of a power plant consisting of ten SMRs with a combined capacity of 200 MWe. The agreement also includes a power purchase agreement with a minimum length of 24 years by LSEZ and its tenants.

Will last energy implement SMR technology in Poland?

"Poland is one of the first countries where Last Energy plans to implement our SMR technology," said Damian Jamroz, General Manager of Last Energy's Polish subsidiary, Last Energy Polska.

Will Enea and last Energy cooperate on SMR deployment in Poland?

In June, Last Energy signed an agreement with Polish state-owned energy company Enea SA to cooperate on the deployment of SMRs, potentially in Poland. Under the Letter of Intent between Enea and Last Energy, the two companies will initially cooperate on the development, construction and further distribution of SMRs.

Why is nuclear energy important to Poland?

"Nuclear energy offers countries a powerful strategy to achieve both. Today's agreement is a critical step toward bringing stable, reliable and cost-competitive energy to Poland, and establishing a much-needed model for how energy security and climate goals can align for the industrial sector."
