

## Solar Energy South Africa

# Malawi btm energy

## Overview

---

What is the energy supply in Malawi?

In Malawi, 84% of the total primary energy supply comes from biomass (firewood, charcoal, agricultural and industrial wastes). The country's total installed electricity capacity is currently at 351 MW, with around 98% of it coming from Hydro on the Shire river. Malawi's energy supply is dominated by biomass.

What is the energy balance of Malawi?

Removal of duty and surtax on importation of renewable energy technology equipment. Despite the above reforms, by 2010 the energy balance of Malawi comprised around 89 per cent biomass compared to the target of 75 per cent biomass usage for the same year.

Which energy technologies are used in Malawi?

The PV, biogas and wind systems are mainly standalone household and/or institutional systems in schools, rural healthcare centres, remote offices, and tourist accommodation places. Table 2. Installed generation capacities of energy technologies for Malawi. This includes the Kapichira 64 MW which was commissioned in January 2014. 3.

What percentage of Malawi's energy is sourced from biomass?

Despite a range of efforts by local and international stakeholders to increase access to modern energy sources in the country, 89 per cent of Malawi's energy is still sourced from traditional biomass mainly fuel wood.

How can Malawi diversify its energy mix?

The government of Malawi has recognized this challenge and has made efforts to diversify the country's electricity mix by promoting the use of renewable energy sources. Currently, JCM solar is feeding 80MW into the grid and Serengeti is feeding in 21MW. EGENCO also supplies 1.3 MW from solar, to

Chizumulu and Likoma Islands.

How much energy does a household need in Malawi?

Based on the minimum energy requirement, an average household of 5 in Malawi would need 300 kWh per month . In order to meet this energy requirement from electricity, a household would need a system rated at least 1.7 kW with a capacity factor of at least 25 per cent and with storage.
