Sunpal, a Malaysian solar company founded in 2008, provides PV panels, batteries, inverters, and solar systems, focusing on sustainable, cost-effective energy solutions used in over 80 countries.

The best batteries available for solar power use are Absorbed Glass Mat batteries. The electrolyte is held by the woven glass mat between plates making them leak/spillproof. They give superior performance, maintain voltage better, self-discharge slower, and last longer.

Because of all these reasons, lithium-ion batteries have been proven to be the best choice of batteries when it comes to solar power. They do cost more upfront, but their price is worth it because they definitely get the job done right.

Types of Solar Panels

Made from polycrystalline cells (also known as polysilicon (p-Si) and multi-crystalline silicon (mc-Si)), these panels are the most common and the cheapest type of solar panels. Key Factors: The process used to produce polycrystalline silicon is cost-efficient and simple; Tend to have slightly lower heat tolerance in comparison to monocrystalline panels i.e. they perform slightly worse ...
