Martinique cactus battery

Overview

Are cactus batteries still useful?

When Cactus launched in 2021, second-life batteries were the most cost-effective component for BESS applications. But today, new lithium iron phosphate cells have become cheap enough to replace the old Teslas in most new storage units. Nonetheless, the elderly batteries still play a useful role.

Does cactus have a second-life battery?

With the new cash injection, Cactus plans to build a portfolio of over 1,000 storage systems. For the Tesla batteries, however, the second job is not guaranteed forever. When Cactus launched in 2021, second-life batteries were the most cost-effective component for BESS applications.

Are Tesla Batteries A good replacement for a cactus battery?

For the Tesla batteries, however, the second job is not guaranteed forever. When Cactus launched in 2021, second-life batteries were the most cost-effective component for BESS applications. But today, new lithium iron phosphate cells have become cheap enough to replace the old Teslas in most new storage units.

What is cactus & how does it work?

The concept is the brainchild of Cactus, a startup based in Finland. Cactus converts the batteries into smart electricity storage units, which optimise energy consumption. Investors are providing growing backing for the approach. Cactus today announced that it's raised over €26mn in equity funding, which the startup will use to build more units.

Why is cactus a good investment?

A volatile energy market, increasing uptake of EVs, and the growing production of solar power have boosted the demand for smart energy storage systems. Investors in Cactus highlighted the impact of the green transition,

which requires electrification across all sectors of society.

How does cactus upcycle Tesla batteries?

Cactus today announced that it's raised over €26mn in equity funding, which the startup will use to build more units. OP Finland Infrastructure LP and the Finnish Climate Fund are the lead investors in the round. To upcycle the Tesla batteries, Cactus disassembles their cassettes and extracts their modules.
