[SeeO2 Energy Inc](#)

SeeO2 Energy creates symmetrical electrolysis cells based on proprietary electrocatalysts. Their transformative technology captures carbon emissions and economically converts CO2 into valuable chemical building blocks like CO, syngas, methane, and oxygen. Energy innovation in your inbox Stay tuned about the latest energy tech trends

Most Innovative Energy Conversion Specialists

With most energy being generated from fossil fuels, the release of carbon dioxide (CO2) was seen as an inevitable side effect of producing enough energy to sustain the incredible, and rising, rate of human consumption. SeeO2 saw a future in which CO2 could be collected, broken down and used as part of a range of chemicals. SeeO2 Energy Inc

[Chris Goodall, PhD.](#)

Chris is currently the Managing Director and President of TDK Canada. Chris leads this R&D Team in Calgary, Canada, towards creation and design of next generation navigation software for improved positioning of consumer devices and autonomous driving platforms.

#SET100 at WEC24 - Road to Abu Dhabi Interview: SeeO2

Energy

We thank them for their work toward the global energy transition and for sharing with us the following insights. #SET100 Start-up: SeeO2 Energy (Canada) SeeO2 Energy Inc. is a company focused on efficiently converting carbon dioxide (CO₂) into marketable and clean value-added fuels and chemicals using reversible fuel-cell technology.

[Mark Montemurro](#)

Mark has over 30 years of experience in energy industries, including significant oilsands project experience as well as early stage technology commercialization. Previously he has held a variety of senior executive positions, primarily leading subsurface, facility and operations teams with Baytex Energy, Sunshine Oilsands Ltd., Laricina Energy

SeeO2 Energy

SeeO2 Energy is converting carbon dioxide into marketable and clean value-added fuels and chemicals using reversible fuel technology. Its electrolyzers can efficiently generate gases on-site such as hydrogen, carbon monoxide, or oxygen in a reliable way. The company is developing an efficient and high performance reversible solid oxide cells
