Montenegro gefa power

Overview

What is the energy development strategy of Montenegro?

The Energy Development Strategy of Montenegro sets out objectives and defines mechanisms for the transition from the current energy system to a safe, competitive and environmentally acceptable energy paradigm by 2025. It also provides guidelines for the development of the energy sector with the aim of attracting investors.

Should Montenegro build a hydropower plant?

As in other Balkan countries, the construction of small hydropower plants has caused widespread public outcry, but in 2020 they generated just 3 per cent of Montenegro's electricity. Against the fluctuating background of hydropower generation, difficult decisions need to be taken on the Pljevlja lignite power plant and nearby mines.

Why did Montenegro not issue energy permits?

Montenegro's Ministry of Economy did not plan to issue energy permits in its Energy Licensing Plan for 2019 because the country is already close to reaching its national target of 33 percent of produced energy coming from renewable energy sources (RES) in final energy consumption. The passage does not provide information on why Montenegro did not issue permits for other reasons.

Will Fortum build a solar power plant in Montenegro?

In October 2018, a consortium between Fortum, Montenegrin energy company EPCG and Sterling & Wilson International Solar FZCO won the public call to build a solar power plant in Montenegro, specifically in the Ulcinj solar site. The consortium proposed to build 250 MW of solar power in Ulcinj.

Can Montenegro reduce energy demand?

Montenegro has great potential for reducing demand through more efficient

energy use. According to IEA statistics, Montenegro's energy intensity has been falling slightly in recent years but is still more than twice that of the EU-28. Inefficient practices such as using electrical heaters for heating are widespread.

Can Montenegro expand its natural gas capacity?

Different sources cite varying levels of potential, but all show that a significant expansion of capacity is possible. Montenegro has no infrastructure for natural gas distribution and does not currently extract oil, though the government is interested in oil and gas production in the Adriatic Sea.
