Motive energy Dominican Republic

Utility-Scale ESS solutions

Overview

Why did the Dominican Republic build a photovoltaic plant?

The energy deficit and dependence on fossil fuels drove the Dominican Republic to step up its commitment to clean energy. DOMINION took on the task of building the photovoltaic plant in this Caribbean country, with an offer that included everything from the design and construction of the plant to its operation and subsequent maintenance.

What are the issues affecting the energy sector in the Dominican Republic?

The issues of grid capacity and storage, in particular, are curbing expansion at normative and technological level. The Dominican Government continues to expand renewable energy, electromobility and energy storage technologies and is reducing emissions of greenhouse gases.

Is the electric power sector affecting the Dominican economy?

Despite the present administration's efforts to increase the installed capacity of electricity generation from renewable sources, the electric power sector continues to be one of the most significant problems affecting the Dominican economy.

Why is the Dominican Republic growing so fast?

The Dominican Republic is one of the fastest growing economies in Latin America. This is also apparent in the expansion of renewable energy. Its share of power generation has more than tripled since 2017.

Why should you choose motive energy?

Increase profits. At Motive Energy, reducing energy costs and boosting profits for our customers are fundamental to our services. By implementing advanced energy solutions, from efficient solar arrays to sophisticated battery storage systems, we ensure significant savings on energy expenses, directly enhancing our clients' bottom lines.

How many solar panels are used in Dominican Republic?

For the construction, which has had an investment of 93M USD, a total of 147,870 solar panels were used. The project helps Dominican Republic to reach its goal until 2025, the year in which they expect 25% of the electricity consumed by the country to come from renewable energies, and has generated more than 500 direct jobs in the region.
