

## Solar Energy South Africa

# National portal for rooftop solar Finland

## Overview

---

Solar energy in Finland is used primarily for water heating and by the use of to generate electricity. As a northern country, summer days are long and winter days are short. Above the , the sun does not rise some days in winter, and does not set some days in the summer. Due to the low sun angle, it is more common to place solar panels on the south side of buildi.

Which countries install solar panels in Finland?

Austria, Denmark, Estonia, Fi. List of Finnish solar panel installers - showing companies in Finland that undertake solar panel installation, including rooftop and standalone solar systems.

Why is Finland a good place to install solar panels?

"Finland's advantage is its low atmospheric temperature, which improves the efficiency of solar photovoltaic cells. The colder it gets, the better the solar panels work. Solar panels can also withstand snow loads if they are installed following directions.

Is solar PV a viable alternative to wind power in Finland?

However, solar PV is currently in Finland the second least cost option for new electric power generation after wind power. The Energy Authority () collects the official data of grid-connected PV electricity in Finland from the grid companies on yearly basis. The results of the survey are published on late June.

Are there governmental auctions for solar PV in Finland?

No governmental auctions or tender schemes have been arranged for solar PV in Finland. The new support system for renewable electricity currently in the parliamentary process will also be applicable to solar PV. It will be a premium-based PPA auction arranged by the State of Finland.

Is solar energy a viable alternative to self-consumption in Finland?

In Finland, solar electricity has so far been a financially competitive alternative

only if the self-consumption rate has been high. Now, however, the situation is changing, as solar farms are being built to produce electricity to sell directly to the main grid. Globally speaking, solar energy generation is a massive business.

What is the most powerful photovoltaic solar plant in Finland?

In 2015, the Kaleva Media printing plant in Oulu became the most powerful photovoltaic solar plant in Finland, with 1,604 solar photovoltaic (PV) units on its roof. Although the city of Oulu, located near the Arctic Circle, has only two hours of weak sunlight in December, the photovoltaic cells work almost around the clock in the summer.
