Solar on Warehouses

Solar power is the fastest growing form of energy in the United States, thanks in large part to its low and rapidly dropping price and to supportive public policies in some parts of the country. But the United States has the technical potential to produce 78 times as much electricity as it used in 2020 just with solar photovoltaic (PV) energy.

Nauru: Solar Power Development Project , Policy Commons

The facility will finance the grant to Nauru for the

Solar Power Development Project. The project will finance (i) a grid-connected solar power plant with a capacity of 6 megawatts (MW) of alternating current; and (ii) a 2.5-megawatt-hour (MWh), 5 MW battery energy storage system (BESS) to enable smoothing of intermittent solar energy.
