

Solar Energy South Africa

New Caledonia energy systems Ltd

Overview

What is New Caledonia's energy mix?

New Caledonia's energy mix consists of 97.7% fossil fuels, including 54.1% petroleum products (mainly fuel oil and diesel), 43.6% coal, and 2.3% renewable energies. The metallurgical industry consumes 61.2% of the total energy consumption of the territory.

What is the New Caledonia energy transition scheme?

Guided by the Agence Calédonienne de l'Énergie (ACE), the New Caledonia Energy Transition Scheme (STENC) defines the island's energy policy up to 2030.

What is New Caledonia's main energy source?

New Caledonia depends on imports for 96% of its energy needs, mainly used in mining operations. Imports of coal and oil products remain the main energy sources of the territory.

What is the role of the Caledonian Energy Agency?

The Caledonian Energy Agency's role is to implement the energy transition scheme set out by the government and to contribute to the development of the electrical system. It also promotes the rational use of energy and the development of renewable energies.

How can the Caledonian authorities improve energy security?

Vulnerable in terms of energy, the Caledonian authorities are thus seeking to become less dependent on external energy sources and to improve the competitiveness of the territory. There is room for improvement as only 12% of electricity production comes from renewable sources.

What are the main energy sources of the Caledonian territory?

Imports of coal and oil products remain the main energy sources of the territory. Vulnerable in terms of energy, the Caledonian authorities are thus seeking to become less dependent on external energy sources and to improve the competitiveness of the territory.

Noumea, New Caledonia Noumea, New Caledonia
ABSTRACT Thermal springs in New Caledonia are overall typical of low temperature, deep circulation geothermal systems, with low flow rates and a low dissolved solids content.

[New Caledonia , ERK Energy Systems](#)

ERK Eckrohrkessel GmbH grants licenses to manufacturers and engineering companies for the production of corner tube systems, without any geographical restrictions; these licenses can be expanded to include fuel engineering (fluidised bed, two-stage combustion) systems.

About Us

New Zealand Scholarship. PSC provides scholarships for 3rd year and 4th year University students studying power engineering in New Zealand. The Electrical Power Engineering Centre (EPECentre) at the University of Canterbury helps us manage the scholarships and is one of the ways we enhance the co-operation between academia and industry.

Easy compilation of tender documents for Energy applications

KROHNE added the new sections "Energy" and the fourth purification stage at wastewater treatment plants to the "Planning Tool for generation of tender documents". The online tool, which is aimed at planning engineers and operators, thus covers not only water and wastewater systems but also the application areas of district heating, district cooling and green HVAC.
