

## Solar Energy South Africa

# North Korea smart energy set

## Overview

---

Does North Korea have energy security challenges?

Access to solar panels has created capacity where the state falls short, but the overall energy security challenges facing the nation are daunting. This report, “North Korea’s Energy Sector,” is a compilation of articles published on 38 North in 2023 that surveyed North Korea’s energy production facilities and infrastructure.

Does North Korea still use solar power?

In this installment of our series on North Korea’s energy sector, we move away from official and commercial uses of solar and seek to understand the growing use of solar power for personal energy consumption in a country where its people still suffer from an unreliable power supply nationwide.

Why does North Korea need a solar power supply?

An insufficient and unstable power supply is one of the critical challenges North Korea struggles to address. While solar energy has provided one way for citizens to better cope with this reality, it is incapable of supplying enough power to satisfy everyday operations and needs.

Can solar power solve North Korea's energy problems?

Jeong-hyeon, a North Korean escapee, told the Financial Times that many residents in Hamhung, the second-most populous city, “relied on a solar panel, a battery and a power generator to light their houses and power their television”. But solar power is still only a partial solution to the country’s energy woes.

How does North Korea generate electricity?

In 2017, North Korea generated 55 percent of its total electricity from hydroelectric plants and the remaining 45 percent from fossil fuels, signifying a national reliance on renewable energy. However, North Korea still favors

coal as a major export commodity and overall energy generator for its economy.

Does North Korea have a two-tier energy system?

Under North Korea's two-tier energy system, which prioritises industrial facilities, the only way for many citizens to access electricity is to pay state functionaries to allow them to install cables to siphon off power from local factories.
