North Macedonia scale microgrid solutions

Overview

What is scale microgrids?

Scale Microgrids designs, builds, finances, and operates cutting edge distributed energy assets that offer cheaper, cleaner, and more resilient power.

How will a new solar plant help Macedonia?

Andi Aranitasi, EBRD Head of North Macedonia, said: “The new solar plant will help the country, which faces severe air pollution from coal, to reduce its reliance on ageing coal-fired infrastructure. It will also generate cheap electricity in times of very high market prices.

What if a utility outage is a microgrid?

In the event of a utility outage, our microgrids can operate independently (or “island”) from the grid and ensure critical operations stay online. Scale manages everything from microgrid design and construction to ongoing operations and maintenance, making a complex process headache-free.

Is North Macedonia a good place to invest in green energy?

Dimitar Kovačevski, Prime Minister of North Macedonia: “It is really a great pleasure to be here today, where once a big environmental polluter was located and now we are producing green energy. The benefits of this investment are manifold.

Why should you use microgrids?

Go beyond the grid with cheaper, cleaner, and more resilient on-site energy from the industry leader in microgrids. Our microgrids deliver results for your organization, with optimized on-site energy resources that provide cost savings, lower emissions, and enhanced resilience.

Scale Microgrid Solutions Gets Equity Commitment ...

Scale Microgrid Solutions (SMS) has secured an equity commitment of up to \$300 million from Warburg Pincus. Founded in 2016, SMS is a vertically integrated distributed energy company focused on delivering fully ...

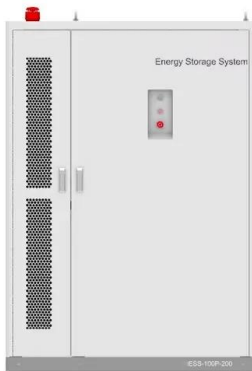

Understanding Microgrids vs. Traditional Off-Grid Systems

Generally, the answer comes down to the scale and complexity of your energy needs. While both solutions provide reliable, renewable power, a MicroGrid serves larger commercial and industrial applications, whereas a traditional Off-Grid system is typically tailored for residential or small commercial use. Understanding MicroGrids

North Macedonia kicks off 30 MW solar tender

North Macedonian electricity producer ESM has launched a tender for the design, procurement, construction, commissioning and handover of two solar plants totaling 30 MW. The two projects are a 10 MW solar plant, Oslomej 2, located at an abandoned coal mine near North ...

Microgrid

Microgrids offer an alternative model for power generation and distribution. Varying widely in configuration and scale, microgrids share a capability of being able to isolate from utility grids and operate using one or more local power sources. This state of operation is often called "islanding" or "island mode."
