Northvolt Ifp São Tomé and Príncipe

Overview

Will Galp & Northvolt join a new lithium-battery value-chain?

Galp and Northvolt have agreed to set up a joint company, Aurora, that aims to become a steppingstone for the development of an integrated lithium-battery value-chain aligned with Portuguese and European ambitions.

Is Northvolt a sustainable company?

Sustainability is a big consideration for Northvolt. Building battery cells is an energy intensive process, with both the manufacturing and the energy cycling to activate them taking a great deal of energy.

Who is Northvolt's VP of Communications at Giga Europe?

Energy-Storage.news was talking to Anders Thor, Northvolt's VP of communications, whilst at Giga Europe in Stockholm, a two-day event (12 & 13 March) hosted by Benchmark Mineral Intelligence. The event brings together Europe's battery ecosystem, from gigafactories to raw material producers.

How many Gigafactory projects does Northvolt have?

Inside Northvolt's first gigafactory, Northvolt Ett, in Northern Sweden. The firm has six gigafactory projects, plus ESS assembly, battery recycling, R&D and joint venture projects. Image: Northvolt.

How much energy does Northvolt use?

Northvolt's CEO estimates that making 1kWh of battery cells uses between 80 and 100kWh of energy and, when the Skelleftea factory is at full capacity, it will account for up to 2.5% of Sweden's total electricity load.

Does Northvolt have a sustainable battery plant?

As part of the agreement, Northvolt will secure an offtake for up to 50% of the

plant's capacity for use in its battery manufacturing. The JV partners are unwavering on driving the highest standards of sustainability, notably in the extraction and concentration of spodumene, the processing of lithium hydroxide, as well as in all related processes.

Why lithium-metal matters

Cell architecture. The new cell works in a comparable manner to a conventional lithium-ion cell, but with two significant changes in its build. Where today's lithium-ion cell features a graphite anode that stores lithium ions during a state of charge and releases them during discharge to provide power, Cuberg's lithium-metal cell
