

Solar Energy South Africa

Optimal energy ltd Benin

Overview

How much energy does Benin use in total?

In the year 2009, Benin's total energy consumption was 3,475 ktoe (World Bank, 2009).

Who are the actors in the solar industry in Benin?

The Interprofessional Association for Renewable Energy Specialists (AISER - Bénin) is one of the main actors in the private sector for solar products and installations in Benin. It is an association for promotion and advocacy of renewable energy in Benin.

Does Benin have a large hydroelectricity potential?

Benin has a huge and untapped renewable energy potential, particularly in hydroelectricity. Currently, only one major hydroelectric site functions in the country. Developing over 80 pre-identified sites using micro-hydro applications could help Benin increase its energy resilience and better utilize its hydroelectricity potential.

How can Benin increase its energy resilience?

Benin's energy resilience can be improved by developing over 80 pre-identified sites using micro-hydro applications. This would help Benin increase its energy resilience, as fluctuations in fossil fuel prices compromise its domestic capacity to develop energy services. Only one major hydroelectric site currently functions in Benin, highlighting the potential for expansion in this area.

Who is responsible for generating electricity in Benin?

Societe Beninoise d'Energie Electrique (SBEE) is responsible for generating around 13% of electricity in Benin through diesel generators. ABERME (Agence Beninoise d'Electrification Rurale et de Maitrise d'Energie), on the other hand, is responsible for rural energy supply.

How much does it cost to electrify Benin?

The total investment cost required to achieve universal electrification in Benin by 2030 ranges from 1.2 to 5.9 billion USD.

Solar PV Analysis of Cotonou, Benin

Cotonou, Littoral, Benin is located in the Tropics, where sunlight is pretty much consistent throughout the year. This makes it a great place for solar energy generation all year round. The amount of electricity you can generate from each kilowatt (kW) of installed solar panels varies slightly by season: in summer you can expect about 4.76 kilowatt-hours (kWh) per day, in ...
