SOLARMAN Solution for Battery Remote Management

With the Covid-19 virus sweeping the globe, more and more households are installing residential energy storage systems. According to IHSMarkeit, the new installed capacity of global residential energy storage has increased significantly in 2020, reaching 3.1GWh in the first three quarters. Furthermore, Germany and USA have made a great contribution to the ...

Energy monitoring systems: the key to sustainable energy

...

As global initiatives for sustainable development continue to heat up, energy management has become an important area for companies and organizations to pursue sustainability. In this context, energy monitoring systems become a key tool for achieving energy management and efficiency improvements.

- 
Efficient Higher Revenue
 - Max. Efficiency 97.5%
 - Max. PV Input Voltage 600V
 - 500W Peak Output Power
 - 2kW/100Ah, 200Ah DC Input Charging
 - Max. PV Input Current 50A, Compatible with High-Power Modules
- 
Intelligent Simple O&M
 - IP66 Protection Degree: support outdoor installation
 - Smart I/F Curve Regulation Function: locate PV string faults accurately and automatically detect faults
 - DC & AC Type II SPDs: prevent lightning damage
 - Battery Reverse Connection Protection
- 
Flexible Abundant Configuration
 - Plug & Play, EPS Switching under 20ms
 - Compatible with Lead-acid and Lithium Batteries
 - Max. 6 Units Inverters Parallel
 - AFC Function (Optional): when an arc fault is detected the inverter immediately stops operation

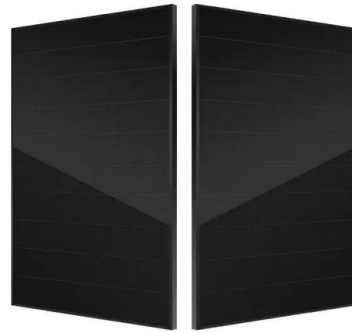

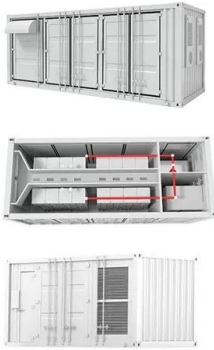

Battery Storage System- Revolutionizing Energy Management

Battery storage system is an essential component of modern energy solution, offering a way to store energy for future use. These systems are becoming increasingly vital in a world transitioning towards renewable energy, as they help balance supply and demand, improve grid stability, and reduce dependency on fossil fuels.

Together with IKEA, SOLARMAN creates a zero- carbon smart home

Home; Support & Service. FAQ; Videos; Downloads; Service Contact stores in 30 countries. It has bought 9 PV plants (capacity: 440MW) in Germany and Spain, with a view to achieving the global goal of "carbon neutrality". SOLARMAN has established a close cooperation relation with ZCS in Italy, CORAB in Poland, SunSpec in USA and Solargis

About Us

Watch Video About Us IGEN Tech Co., Ltd., founded in 2009, a high-tech enterprise, is professional in innovative applications based on technologies of IoTs, cloud computing and big data. In 2016, IGEN Tech obtained round A financing from Sequoia Capital, and in 2022, it obtained a new round of additional strategic investment. Being focus on [...]

The Refurbished SOLARMAN International Website is Online

With the deep understanding of SOLARMAN one-stop service system for intelligent management of global new energy assets, SOLARMAN international website has been redesigned and upgraded, aiming to offer a more professional and customer-oriented service for global customers. Domain name:

[Modern weather station](#)

Modern weather stations use a variety of

advanced instruments and technologies to observe and record various weather phenomena. The most important equipment is the meteorological sensor, which can measure various meteorological elements such as temperature, humidity, wind speed, wind direction, air pressure, precipitation, etc.

Maximizing Solar Power Efficiency with a Solar Power Monitor

SOLARMAN is a brand of IGEN Tech, specialized in intelligent solar PV solutions. SOLARMAN products such as SOLARMAN Smart & SOLARMAN Business have been global leading solar PV monitoring and management systems, which covers the whole life cycle of PV station and provides differentiated solutions for distinct users.

Residential

Residential With deep understandings of modern family life, SOLARMAN is able to meet individual user's demands by visualizing household energy consumption and offering scenario-based power management system through IoTs, bringing comfortable and eco-friendly life to global users
 Residential PV Plant Location: Poland
 Installed Capacity: 3KW

Modern power monitoring systems: ensuring efficient and reliable ...

The PV monitoring system is an advanced technology-based monitoring tool used to monitor and record the performance of

photovoltaic power generation systems in real time. It provides accurate monitoring of key parameters such as power generation, voltage, current, temperature, etc. by collecting and analyzing data obtained from sensors on ...

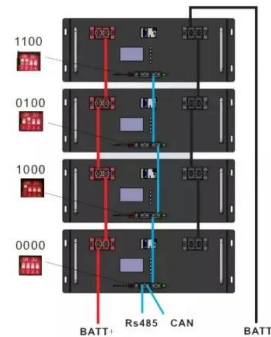

Household Owner-SOLARMAN

SOLARMAN Smart is specially designed for end-users, offering an extremely interactive experience with comprehensive functions such as real-time monitoring and control of home appliances, customized infographic displays and power ...

Inbetriebnahme Deines Balkonkraftwerks und Einrichtung ...

<https://home.solarmanpv> Diese Anleitung erklärt dir Schritt für Schritt, wie Du deinen Wechselrichter mit Deinem Heim-Netzwerk verbindest. Die Einrichtung kann über die SOLARMAN Smart App durchgeführt werden oder über die Konfigurations-Webseite des Wechselrichters. Beide Wege werden im Folgenden beschrieben.

SOLARMAN Intersolar Europe 2023 Highlights

The regional situation continues to be turbulent, energy prices continue to fluctuate, and power supply continues to be tense...Europeans are plagued by energy crises. On the occasion of peak electricity consumption in midsummer, on

June 14, Intersolar Europe 2023 was grandly launched in Munich, Germany, kicking off the prelude to the European energy ...

Mastering energy starts with energy monitoring

Energy monitoring refers to real-time monitoring, recording and analyzing the energy usage of buildings, equipment or systems through various equipment, software and other means, helping users to fully understand energy consumption, discover potential energy-saving opportunities, and provide targeted energy-saving suggestions. . In the current context of ...

[SOLARMAN Business-Top Up](#)

SOLARMAN provides humanistic services for global customers. SIM card top up is one of it. Flow package is frequently used during the data transmission and data reading. Although the cumulative flow is not too much in one year, calculating the service life of a PV plant as 25 years, the flow package requires a lot. [...]

solar Monitoring Software, Power Station Monitoring System

SOLARMAN Business is designed for installers and distributors, which is more suitable for distributed system management. With comprehensive and sophisticated functions,

SOLARMAN Business will provide global leading intelligent O& M solutions for installers and distributors.
