Check out the popular new Solar Trim Ultra bird guard range of accessories which protects solar panels against debris and pests. Why Use a Solar Trim Ultra Bird Guard?

This robust solar bird guard is the premium choice for tiled roofs across the UK. Why Choose a Genesis Solar Panel Trim Bird Guard?

.

Are solar panels bird proof?

The cheapest and least effective methods of solar panel bird proofing is chicken wire. It doesn't last, the birds can still get through it often within a short space of time. In the Scottish landscape, solar panels are a perfect site for roosting and nesting.

Can twigs damage solar panels?

When the natural ventilation beneath solar panels becomes restricted by twigs, leaves and nesting material temperature can rise to impair the performance of your PV panels. Solar panels are at risk of damage that give rise to faults that adversely affect the lifespan of panels. These faults may result in earth leakage problems.
