

## Solar Energy South Africa

# Photovoltaic inverter fault e4

**18650** 3.7V  
Li-ion  
RECHARGEABLE BATTERY

**2000mAh**

## Overview

---

What are solar inverter error codes?

Solar inverter error codes notify you of a situation threatening the normal operation of your solar power system. Many different things can go wrong and disrupt electricity generation from a solar PV system. The inverter will detect it and generate corresponding error codes to notify you.

What if my solar inverter error code is E001?

Contact Manufacturer: If this solar inverter error code still exists, you must contact the manufacturer like Growatt or Inverex, or your solar installer for further assistance. There might be more serious internal issues that require technical support to resolve. 2. Error Code E001 Description: Model Fault 1 LCD Display: E001.

How to maintain a faulty solar inverter display?

To maintain a faulty solar inverter display, you can proceed with the following steps: Begin with turning off the input PV switch on the photovoltaic inverter side. Next, disconnect the PV input DC switch and finally, switch off the battery switch.

Why is my solar inverter NOT working?

Modern smart inverters also monitor the performance of solar systems and give real-time reports. The term “inverter error” does not mean that the inverter is broken. Yes, the issue could be the inverter, but it can also come from the other solar power system components or factors outside the system.

What does error code w020 mean on a solar inverter?

For additional help and investigation regarding solar inverter problems and solutions, get in touch with the manufacturer. 30. Error Code W020 Description: PV Isolation Low LCD Display: PV Isolation Low Troubleshooting: Restart the Inverter: Turn off the inverter and then switch it on. This could

potentially rectify temporary internal faults.

Do inverter error codes always indicate a problem?

When the inverter, in its monitoring capacity, detects an issue, it generates and displays a code to notify you of the problem so that you can take appropriate action. True, the component of the solar system that is most likely to fail is the inverter. However, “inverter error codes” are not always issues with inverters.
