How much does a solar panel system cost?

A decade ago a typical solar panel system cost around £20,000 and would take around a decade to cover those set-up costs. But prices for solar panel systems have fallen by more than 60% since then, meaning it takes between four and five years for a system to pay for itself.

Why are solar panels so expensive?

Panel efficiency: The more sunlight a solar panel can convert into electricity per sq metre, the more expensive it will be. Panel number: More solar panels means more materials, which means a higher cost. You can limit the number of panels you need by choosing highly efficient ones (although they may cost more).

How much does a solar PV installation cost per kilowatt?

The mean average cost per kilowatt of a small solar PV installation (0-4kW) is above £2,000 for the first time since these records began in 2013/14. Prices for larger solar installations (4-10kW) increased even more dramatically - by 31% since 2021/22.
