

## Solar Energy South Africa

# Photovoltaic panel installation canopy

## Overview

---

Can I use a canopy with a solar panel?

Canopies are the perfect base for solar panels, allowing you to generate energy and provide shade and shelter at the same time. We have four canopy frames which can be paired with most solar panels. We will work with your solar panel provider to select the most suitable canopy for the panels.

What are solar canopies?

Solar canopies are systems that use either wood, metal, or another material to hold up solar panels on a non-roof structure. The most well-known version of a solar canopy is probably a solar carport. The system can also be used residentially on pergolas, or other constructed systems. Why have homeowners started showing interest in solar canopies?

.

Can karasolar install a solar carport & canopies?

KaraSolar Ltd can supply and install a fantastic range of solar PV carports & canopies. With energy costs constantly on the rise, solar panels for both domestic and commercial use have become an increasingly attractive option. Now your car park can offer all the benefits of solar.

What is a freestanding solar canopy?

It is a robust freestanding solar canopy that is supplied with a corrugated steel roof and is supported by a strong steel frame. We can supply and install the full solar canopy system including panels, or we can supply and install the canopy system without panels, ready for your own solar panel supplier to install; this is project dependant.

Does a solar canopy pay for itself?

Your solar canopy will pay for itself over the years through the electricity the

solar panels generate. Also, with energy bills increasing, the savings you will make on your bills will be greater than before, so now is the perfect time to invest in solar canopy or solar canopy.

What are solar carports & solar canopies?

Solar carports and solar canopies are increasingly popular in the UK due to their efficiency and dual functionality. The tilted roof design offers natural drainage for rainwater, which is then collected by guttering and channelled away. Electricity generated by the carports' solar panels is then immediately available to be used onsite.
