# Photovoltaic panels on cement roofs

## Overview

---

Can solar panels be installed on a fibre cement roof?

Briarwood recommends the use of solar panels installed on any fibre cement roof providing it has been correctly designed and pre-planned prior to installation. There are various types of solar panel systems which can be installed above a fibre cement roofed structure.

Can solar panels be installed on a commercial roof?

If you're considering installing a residential or commercial solar panel system, you might wonder if your roof type is appropriate for a solar installation. The good news is that solar panels can be installed on just about any roof type, but the installation process and mounting hardware might vary from material to material.

Can you install solar panels on a flat roof?

Ballast systems are simply a weighted racking setup that holds solar panels in place. If you need to drill into your flat roof to install solar panels, don't worry – your solar installer will ensure that the holes they drill are as small as possible and sealed correctly to avoid roof damage or leaking. Can you install solar panels on wooden roofs?

.

Which roof is best for solar panels?

No one type of roof is best for solar panels – mounting solutions exist for just about every roof out there. Some roofs will cost more to mount solar panels on. This is due to the different equipment installers need to use. Start comparing customized solar quotes today on the EnergySage Marketplace.

Can solar panels be installed on tiled roofs?

In conclusion, embracing solar energy through the installation of solar panels

on tiled roofs not only helps reduce carbon emissions but also provides long-term cost savings. Start your journey towards a sustainable future by exploring the possibilities of fitting solar panels to your tiled roof today.

Can solar panels be installed on a slate roof?

There's more work involved than with asphalt tiles, but solar panels work just fine on slate and concrete tile roofs. Clay, slate, and concrete tiles are usually removed and replaced during solar panel installation.
