Photovoltaic standard bracket installation diagram

Overview

What is included in a solar installation manual?

This installation manual contains important electrical and mechanical installation information as well as safety information that you must be familiar with, providing important safety instructions for the installation, use and maintenance of solar modules.

How to install a photovoltaic light fixture?

The fixture shall be installed within the scope authorized by Suntech. The inside side of the fixture and the side of the photovoltaic module should be completely fitted. In any fixture installation mode, the fixture must not touch the glass or deform the frame of the bracket or module.

Who should install a solar panel?

All electrical installation and procedures should be conducted by a licensed electrician or solar contractor. Routine maintenance of a module or panel shall not involve breaking or disturbing the bonding path of the system. All work must comply with national, state and local installation procedures, product and safety standards.

How to install solar stack pedestals?

Solar Stack pedestals can be installed on different types of roofs: Tile, Modified Bitumen, TPO, Concrete etc. Roof must be cleaned with brush. Place, where the Solar Stack pedestals and solar panels are to be placed on the roof must be clean, dry and at.

Who should check the roof structure of a solar PV system?

5.9.4 The MCS Contractor shall ensure that the roof structure is checked by a suitably competent person to ensure it can withstand the loads imposed by the solar PV system. 5.9.5 For the typical roof structure types shown in Table 1, the calculation methodologies given should be used. qualified structural

engineer shall be consulted.

How far from the coast can a photovoltaic system be installed?

Based on the distance from the coast, Suntech generally divides coastal installations of photovoltaic systems into 3 categories: 0 m to 50 m, due to concerns about salt spray corrosion, it is recommended to contact the Suntech technical team to evaluate the solution.
